- ▲ Result Maxilla
- This 3D visualization shows a lateral view of a maxilla reconstruction. The maxilla is highlighted in a vibrant green color, contrasting with the darker green of the surrounding skull structure. The reconstruction is semi-transparent, revealing the underlying bone structure. The maxilla is positioned anteriorly and inferiorly to the nasal cavity. The surrounding skull is rendered in a dark green color. The mandible is visible in a light blue color at the bottom. The image is presented in a lateral view, showing the profile of the maxilla and its relationship to the rest of the skull.
